Education

The University of Arizona — Tucson, AZ
Bachelor of Science in Business Administration (BSBA), Business Analytics — Expected May 2028
Honors: Global Wildcat Award (merit-based scholarship, 50% tuition waiver)
Relevant Coursework: Statistics, Calculus, SQL, Data Analytics, Python Programming

Experience

Self-employed — Tucson, AZ
Crypto Trader & Trading Systems Builder — Summer 2026 – Present

- Operate automated, market-neutral trading systems across four perp DEXs (Lighter, Variational, Entropy, POPDEX) on AWS Tokyo with personal capital, executing ~$1M in daily notional volume
- Evaluate venues on maker/taker fee tiers, API reliability, latency, cross-venue liquidity and incentive programs before allocating capital, and review P&L by venue and parameter set daily to decide allocation across instances
- Monitor live systems and respond to incidents; traced a –$130 loss to an expired session token that made the system read an unknown position as flat and unwind the hedge, leaving a one-leg exposure
- Retired the first version after a month of live testing showed negative expected value after fees; diagnosed latency as the cause and redeployed next to the venues' servers
- Built a Claude Code agent workflow in which one agent proposes code changes and a second reviews them, with human approval before anything goes live

Independent Content Creator — Remote
Chinese-language crypto commentary on X (@rxu107) — Jan 2025 – Present

- Grew a Chinese-language Web3 account from 0 to 10K followers organically, averaging 4,000–5,000 daily impressions; top post exceeded 100K impressions

Skills & Interests

Technical: Python, SQL, Excel, PowerPoint
Language: Mandarin (native), English (fluent, TOEFL 102)
Interests: Bouldering
